# THEME

Reinventing  
traditional  
supply chains  
in wake of  
global  
uncertainty

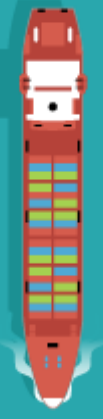

## ABOUT US

### 2nd Edition BW Supply Chain Competitiveness Summit & Awards 2023:

As the world finds its new normal in a post-pandemic, geopolitically-uncertain, world, the impact on manufacturing, agrarian & DTC economies worldwide cannot be overstated enough. Join us as we convene leading logistics service providers, shippers, regulators, transformation & innovation heads, ESG & cyber risk specialists, and CRM leaders, to prepare a template for efficient, competitive, sustainable, failsafe, & digitally progressive supply chains. The initiative looks at efficiency creation in the freight carriage lifecycle; importance of cyber risk invulnerability protocols; impact assessment of digital transformation in rebooting outmoded supply chains; and how heightened investor, regulator, & consumer interest in sustainability is driving corporate India to create green, transparent, & cyclical supply chains.

Get up-to-date on how innovations in food-processing tech, picking, packaging, & carriage minimise wastage

Chance for LSPs & shippers to figure out how digital transformation is optimising the in-transit experience

Reap the benefits of knowing how the power of analytics is boosting CRM, new acquisitions & business retention

Opportunity for LSPs & shippers to learn from successes in multimodality adoption

Understand how shipper manufacturing footprints are changing & why it is important

Chance for manufacturing leaders to understand how digital transformation prioritises worker welfare, productivity & efficiency

Figure out whether sustainable supply chains are viable & how so

Know whether blockchain deployment can create commercially-viable & sustainable supply chains

Opportunity for cyber risk professionals to gain know-how on how to safeguarding business

Gain an appreciation for the role embedded sensors play in the dispatch to delivery lifecycle

Learn how to combat cyber risk vulnerability when your supply chain processes are an intricate network of relationships

Insights for Digital Transformation & Innovation leaders on how to harness technology in reinventing legacy supply chains

Take a sneak peak into the future with intelligent robotics

Answer the question whether in-transit drone technologies & autonomous navigation have a future in India

## Why Attend?

# Who Should Attend?

Heads – Supply Chain, Logistics & Procurement

Heads – Manufacturing, Plant, Assembly, Warehousing, Site Operations, Process & Plant, Automation

Heads – Commercial, e-Commerce & Distribution, Export & Import, Supply & Demand, Inbound & Outbound

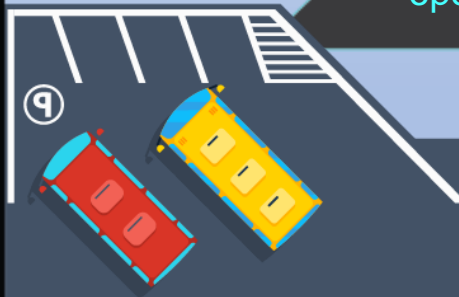

Heads – Digital Transformation & Innovation

Heads – Customer Experience, Service, Acquisition, Retention, Relationship Management, Loyalty

Chiefs – Sustainability, Sustainability Transformation, Corporate Sustainability, ESG

CISOs & Information Security specialists; Cyber Risk, Risk Management, & Mitigation professionals, and Data Privacy & Protection leaders

Logistics Service Providers (LSPs) – Multimodal Transport Operators (MTOs), Freight Forwarders, Express logistics SPs; Truckers & Transporters; Rail operators; Shipyards; Air cargo operators; Warehouse owners; Cold Chain

Opportunity for LSPs to powwow with manufacturing, plant & assembly leads, and chiefs of supply chain

One-stop-shop for technology providers to crack manufacturing with access to their Digital Transformation, Innovation & CRM leaderships

Chance for cyber security companies to hobnob with leading Indian CISOs, Risk Mitigation, Privacy & protection heads

Position yourself as Thought Leader of repute by running a panel session to impact, influence & drive new business acquisition

Create a Demo-Zone to influence & capture a wide gamut of manufacturing industry professionals

Participate in our Matchmaking series to curate Wish-List of prospects that makes your Top Management's heart beat faster!

Organise a networking roundtable on the conference sidelines to drive B2B engagement, outreach & new client acquisition

**Why Partner with us?**

*Prioritising cold chain & agri-logistics supply chains – Building efficiencies between farm to fork*

*Supply chain competitiveness – Finding the right multimodal mix*

*How geopolitics & innovation are reshaping shipper manufacturing strategies*

*Aligning supply chain sustainability strategies to corporate ESG initiatives*

*Transforming supply chains – Leveraging ESG practices & blockchain technology for a sustainable future*

*How IoT puts the ‘Smart’ in Smart Logistics*

*Combatting cyber risk vulnerability in era of interconnectivity*

*Rebooting the onsite & in-transit experience – Morphing supply chains with intelligent robotics*

*Retrofitting legacy supply chains with location tracking capabilities – Reinventing the on-road experience*
